Suffix B onwards

For the reverse gear roller I have measured the shaft diameter, the gear inner diameter and the cage length.

The dimensions are

Shaft diameter (bearing inner diameter) 25.00mm  
Gear inner (bearing outer diameter) 33.02mm  
cage length 23.57mm

So, am I measuring this right?

The nearest I can find is

Position	Qty	Designation	Service Part No.
----------	-----	-------------	------------------

K25x33x24 which has the cage 0.43mm longer

Don't know about the RGS. Have had good branded bearings and quick service here.

<http://stores.ebay.c...op4autopartsnet>

Guy usually gets back to you regarding P/N and what bearings he can get you. I bought NTK and Timken from him mostly. Reasonable money and he trounced my local BSL by a long way on price, like for like.
