

ELECTRICBRANDS
PRESENTS

X•BUS

MADE IN GERMANY WITH LOVE

E STANDS FOR ELECTRIC,
X FOR SO MUCH MORE

THE XBUS IS THE FIRST VEHICLE WITH UNLIMITED MODULARITY

YOUR LIFESTYLE YOUR BUSINESS

Two chassis variants, X versions.
From Camper, Pickup, Bus,
Box structure, up to Cabrio.

Thanks to its PLUG & DRIVE system,
the XBUS can be converted into the
vehicle of your choice in no time at
all - no special tools are required.
That's because we at ElectricBrands
believe: Mobility should be as simple
and individual as your life.
No matter if for private or business
use.

What are you waiting for?
There are X reasons to hop in...

THE VARIANTS

BASE I+II

THE BASIS FOR ALL OTHER MODULES. OR: THE LAUNCHPAD INTO THE WORLD OF MODULAR MOBILITY

- Battery capacity from **10 kWh to 30 kWh**
- System output **15 kW / peak output 56 kW**
- 4-wheel drive
- Solar modules with up to **260 W/m²**
- **> 1.000 Nm** torque
- Maximum weight allowed **1.600 kg**
- Exchangeable batteries with up to **24 batteries of 1,25 kWh**

PICKUP / TIPPER

PERFECT FOR PROFESSIONAL USE WITH AN OPEN LOADING AREA

- Battery capacity from **10 kWh to 30 kWh**
- System output **15 kW / peak output 56 kW**
- 4-wheel drive
- Solar modules with up to **260 W/m²**
- **> 1.000 Nm** torque
- Maximum weight allowed **1.600 kg**
- Battery system with up to **24 batteries of 1,25 kWh**
- 2 Euro pallets loading area

KOMBI+PICKUP+TRANSPORTER

OUR SWISS ARMY KNIFE: DRIVER'S CAB / REAR CAB OR ALSO WITH AN OPEN LOADING AREA

- Battery capacity from **10 kWh to 30 kWh**
- System output **15 kW** / peak output **56 kW**
- 4-wheel drive
- Solar modules with up to **260 W/m²**
- **> 1.000 Nm** torque
- Maximum weight allowed **1.600 kg**
- Exchangeable batteries with up to **24 batteries of 1,25 kWh**
- 1 Euro pallet loading area

BOX+TRANSPORTER

THE PROFESSIONAL

- Battery capacity from **10 kWh to 30 kWh**
- System output **15 kW** / peak output **56 kW**
- 4-wheel drive
- Solar modules with up to **260 W/m²**
- **> 1.000 Nm** torque
- Maximum weight allowed **1.600 kg**
- Battery system with up to **24 batteries of 1,25 kWh**
- Up to **3.600 l** load volume

CAMPER

ALWAYS READY FOR YOUR ADVENTURE TRIP

- Battery capacity from **10 kWh to 30 kWh**
- System output **15 kW** / peak output **56 kW**
- 4-wheel drive
- Solar modules with up to **260 W/m²**
- **> 1.000 Nm** torque
- Maximum weight allowed **1.600 kg**
- Exchangeable batteries with up to **24 batteries of 1,25 kWh**
- Sleeping space for 2 people
- Kitchen with sink, refrigerator & hotplate
- Extending roof

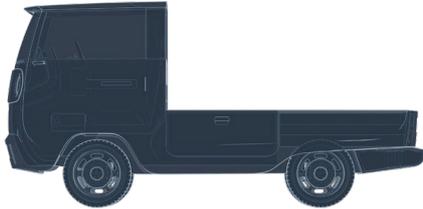

CABRIO

LET THE WIND BLOW THROUGH YOUR HAIR!

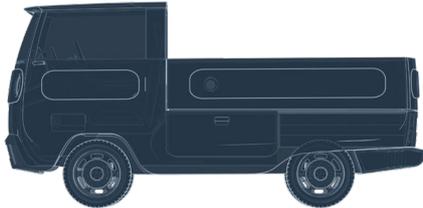

- Battery capacity from **10 kWh to 30 kWh**
- System output **15 kW** / peak output **56 kW**
- 4-wheel drive
- Solar modules with up to **260 W/m²**
- **> 1.000 Nm** torque
- Maximum weight allowed **1.600 kg**
- Battery system with up to **24 batteries of 1,25 kWh**

TECHNICAL SPECIFICATIONS*

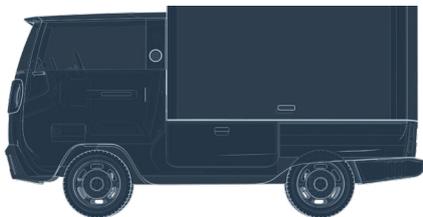

DRIVE SYSTEM:

Electronically controlled 4-wheel drive with an output of **> 1,000 Nm** torque.

BATTERY:

Up to **24** removable lithium battery packs of **1,25 kWh** – a total of up to **30 kWh**. Basic equipment is eight battery packs with a total of **10 kWh** – optionally expandable. Range per kWh of up to approx. **20 km**.

FURTHER DATA::

Vehicle length approx. **3.945 mm**, width approx. **1.690 mm**, height approx. **1.930/1.990 mm**. Empty weight approx. **< 500 – 800 kg** without batteries / people / load. Total continuous rated power of the motors approx. **15kW**. Maximum power approx. 56 kW. Top speed approx. ca. **100 km/h**. Permissible total weight approx. **1.600 kg**. Load volume up to **5,3 m³** (depending on the module).

Up to **6 m²** solar modules integrated into the superstructure.

*The dates and specifications are preliminary and subject to change.

X CHARGING OPTIONS

SURFACE-MOUNTED **SOLAR MODULES**

STANDARD **SOCKET 230 V**

XBUS **EXCHANGE STATION**

FAST CHARGING STATION **TYPE 2**

THE XBUS CAN TRANSFER ITS SOLAR-GENERATED ENERGY TO **HOME STORAGE SYSTEMS**

SOLAR POWERED

Up to 6 m² of solar modules, integrated into the structure of the XBUS, generate up to 10 kWh of additional electricity per day.

Solar self-charging (up to 200 km per day) makes external charging unnecessary for most mobility requirements.

BATTERY PACKS

Depending on the structure chosen, our removable battery packs are integrated either in the back or in the middle of the vehicle.

The exchangeable battery modules make it possible to restore the XBUS's range in no time at all.

Initially, this will be possible at every XBUS dealer across Europe. In the medium term, we will set up autonomous battery replacement stations wherever it makes sense.

ICONIC DESIGN

You just have to love him!
Its iconic design arouses
emotions and guarantees
pure driving pleasure.

„Looks like awesome fun! I would
love to wheel around in one of
these sometime!“

Christopher Boyd via Facebook

„There are some moments when
you would like to bend time
... the XBUS is one of them and you
inevitably want it to be delivered
tomorrow.“

Lifetime_Fiat via Instagram
