

# Tyres

---

## Replacement tyres

Wheel rims and tyres are matched to suit the handling characteristics of the vehicle. For safety, ALWAYS check that replacement tyres comply with the manufacturer's original specification and that the load rating shown on the side wall is the same as that of the original equipment. Contact your Land Rover dealer for further information or assistance.

### WARNING

***Do not replace wheels with any type other than genuine Land Rover parts. Wheels and tyres are designed for both off-road and on-road use and have a very important influence upon the correct operation of the suspension systems and vehicle handling. Alternative wheels which do not meet original equipment specifications should not be fitted.***

**NOTE:** Tyre sizes and pressure are shown in 'General data'.

## Snow chains

Snow chains are designed for on-road use in extreme snow conditions only, and are not recommended for off-road use. It is recommended that only Land Rover approved snow chains are fitted and that the following recommendations are always observed:

- Only Land Rover approved snow chains can be fitted to the front wheels.
- Only fit snow chains in pairs.
- Always adhere to the snow chain fitting and retensioning instructions and the speed limit recommendations for varying road conditions. Never exceed 30 mph (50 km/h).
- Avoid tyre damage by removing snow chains as soon as the road is free of snow.
- If only non-approved snow chains are available, they MUST only be fitted to the REAR wheels.

For more information or assistance, consult your Land Rover dealer.

### WARNING

***DO NOT fit non-approved snow chains to the FRONT wheels - this could damage brake components.***

***When fitting snow chains, always take care to avoid any possible damage to alloy wheels.***

**NOTE:** If a full set of four chains is to be used, they MUST be Land Rover approved.
